## Important Notice:

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto [www.onesurvey.org](http://www.onesurvey.org) (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.**

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

# **SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)**

## **PART 1 - GENERAL**

### **1.1 THE SURVEYORS**

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property.<sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

### **1.2 THE REPORT**

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

---

<sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

### **1.3 LIABILITY**

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### **1.4 GENERIC MORTGAGE VALUATION REPORT**

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### **1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES**

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

#### **1.6 INTELLECTUAL PROPERTY**

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### **1.7 PAYMENT**

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### **1.8 CANCELLATION**

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

## **1.9 PRECEDENCE**

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

## **1.10 DEFINITIONS**

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion*
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

---

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

## **PART 2 – DESCRIPTION OF THE REPORT**

### **2.1 THE SERVICE**

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### **2.2 THE INSPECTION**

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

### **2.3 THE REPORT**

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

2.3.1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

2.3.2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.

2.3.3 Category 1: No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

## 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

## 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

## 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

## 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

*"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an*

*arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.* In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- \*There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- \*There are no particularly troublesome or unusual legal restrictions;
- \*There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

*“Re-instatement cost” is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

## 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a semi-detached, one and a half storey , extended dwelling house.
Accommodation	<p>The accommodation comprises:</p> <p>Ground floor: front entrance hallway, bedroom, shower room, kitchen, (open plan with rear sunroom), lounge.</p> <p>First floor: Landing, bathroom, bedroom.</p> <p>(There is an attic floor hobby/bedroom above the lounge, with staircase access).</p>
Gross internal floor area (m2)	The gross internal floor area is approximately 119 m <sup>2</sup> (including habitable space in the attic floor accommodation above 1.5m in height)*.
Neighbourhood and location	The property is situated within Kirkland Street in the village of Dalry, similar type and age properties are adjacent. The property fronts onto Kirkland Street, with a small parking area to the immediate front and good size rear garden ground. Dalry is a small village which offers limited local facilities, more substantial facilities and amenities are available in the town of Castle Douglas, approximately 16 miles to the south.
Age	Circa 1875.
Weather	Dry with occasional sunny intervals.
Chimney stacks	<p>Visually inspected with the aid of binoculars where required.</p> <p>There are three chimney stacks, of stone construction, with sandstone copings and clay chimney pots.</p> <p>The chimney stacks have lead and cement flashings.</p> <p>The right hand side chimney stack (when facing the front of the building) is communal, although no longer used by the dwelling, nor is the central chimney stack. The left-hand chimney stack serves the solid fuel stove.</p>

<p>Roofing including roof space</p>	<p>Sloping roofs were visually inspected with the aid of binoculars where required.</p> <p>Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3 m ladder externally.</p> <p>Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3 m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the surveyor deems it safe and reasonable to do so.</p> <p>The main roofs to the dwelling are of pitched design, timber framed and slated. The ridges are stone/tiled.</p> <p>There are two dormer windows on the front elevation and one dormer window at the rear elevation.</p> <p>The left-hand side front elevation dormer (when facing the front of the dwelling) and rear elevation dormer are clad in fibreglass. The right-hand side front elevation dormer is flat timber and felt.</p> <p>No access was available to the loft voids, as these were concealed by wall and ceiling linings within the rooms in the roof.</p>
<p>Rainwater fittings</p>	<p>Visually inspected with the aid of binoculars where required.</p> <p>The rainwater fittings are pvc.</p>
<p>Main walls</p>	<p>Visually inspected with the aid of binoculars where required.</p> <p>Foundations and concealed parts were not exposed or inspected.</p> <p>The main walls of the original dwelling are of solid stone construction, approximately 600 mm thick, externally pointed and painted and internally lined with lath and plaster/plasterboard, plastered stone/brick.</p>
<p>Windows, external doors and joinery</p>	<p>Internal and external doors were opened and closed where keys were available.</p> <p>Random windows were opened and closed where possible.</p> <p>Doors and windows were not forced open.</p> <p>Windows in the ground floor front elevation and front elevation dormers are timber framed, single glazed, with internal secondary glazing.</p> <p>The rear elevation of the ground floor bedroom also has timber framed, single glazed windows with secondary internal glazing.</p> <p>The ground floor rear sunroom and ground floor lounge have PVC framed, double glazed, patio doors.</p> <p>There is also a PVC framed, double glazed, external door at the rear elevation of the lounge.</p> <p>The rear elevation of the attic floor accommodation has timber framed, double glazed, skylight/velux windows, as does the attic floor hobby/bedroom.</p> <p>The front elevation external doors are composite/PVC.</p>

External decorations	<p>Visually inspected.</p> <p>External elevations and timber window frames are painted.</p>
Conservatories / porches	<p>Visually inspected.</p> <p>None.</p>
Communal areas	<p>Circulation areas visually inspected.</p> <p>There are no communal use areas in the dwelling.</p>
Garages and permanent outbuildings	<p>Visually inspected.</p> <p>There is no garage.</p> <p>There are two brick stores in the rear garden, with flat timber and felt roofs.</p>
Outside areas and boundaries	<p>Visually inspected.</p> <p>There is a strip of ground to the front of the dwelling laid in tarmac which gives an adequate parking area, with planted border to the front of the dwelling.</p> <p>The dwelling has a good size rear garden, extending to approximately 1/4 of an acre, with flagstone seating areas, glass lawn/drying green, with planted borders/shrubs.</p> <p>There is a small stream which runs through the rear of the garden grounds.</p> <p>Boundaries are defined by hedges, timber fences and post and wire fences.</p> <p>There are open agricultural fields beyond the garden grounds.</p>
Ceilings	<p>Visually inspected from floor level.</p> <p>Ceilings are lined with lath and plaster/plasterboard, with a plaster skim.</p>
Internal walls	<p>Visually inspected from floor level.</p> <p>Using a moisture meter, walls were randomly tested for dampness where considered appropriate.</p> <p>Internal walls are lined with lath and plaster/plasterboard and plastered brick/stone.</p>
Floors including sub floors	<p>Surfaces of exposed floors were visually inspected. No carpets or floor coverings where lifted.</p> <p>Physical access to the subfloor area may be taken if the surveyor deems it safe and reasonable to do so, and subject to a minimum clearance of 1 m between the underside of floor joists and the solum as determined from the access hatch.</p> <p>Floors are of suspended timber/solid concrete.</p>

Internal joinery and kitchen fittings	<p>Built-in cupboards were looked into but no stored items were moved.</p> <p>Kitchen units were visually inspected excluding appliances.</p> <p>Skirtings and architraves are of softwood timber, which have been painted.</p> <p>Internal doors are timber panelled.</p> <p>Kitchen fittings comprise fitted timber, base and units, with fitted worktops and sink unit.</p>
Chimney breasts and fireplaces	<p>Visually inspected. No testing of the flues or fittings was carried out.</p> <p>There is a fireplace in the lounge, with stone fireplace surround, fireplace recess, flagstone hearth and solid fuel stove.</p>
Internal decorations	<p>Visually inspected.</p> <p>Internal walls are, plastered and painted and tiled.</p> <p>Ceilings are wallpapered and plaster and painted.</p>
Cellars	<p>Visually inspected where there was a safe and purpose-built access.</p> <p>There is no cellar.</p>
Electricity	<p>Accessible parts of the wiring were visually inspected and without removing fittings. No tests whatsoever were carried out to the system or appliances.</p> <p>Physical inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.</p> <p>Mains electricity is connected. The electric meter and consumer unit, which is fitted with circuit breakers, are located in a cupboard at higher level in the ground floor entrance hallway.</p> <p>Wiring, where visible, is pvc sheathed and insulated and there are 13 amp square pin sockets.</p>
Gas	<p>No mains gas is available.</p>

<p>Water, plumbing and bathroom fittings</p>	<p>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>Mains water is connected. Water pipes, where visible, are copper and PVC.</p> <p>Sanitary fitments comprise:</p> <p>Ground floor shower room: wc, wash hand basin with pedestal, shower cubicle with mixer shower.</p> <p>First floor bathroom: wc, wash hand basin with pedestal, bath, mixer shower over the bath (no shower screen).</p> <p>Sanitary fitments are in a white suite.</p>
<p>Heating and hot water</p>	<p>Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p> <p>The dwelling has a full oil fired central heating system run from a Worcester Greenstar Heatslave II Ext 18/25 Erp, the external boiler is located at the rear elevation.</p> <p>The central heating system is controlled by a programmer, room thermostat and thermostatic radiator valves.</p>
<p>Drainage</p>	<p>Drainage covers et cetera were not lifted.</p> <p>Neither drains nor drainage systems were tested.</p> <p>Drainage is connected to the public sewer.</p>
<p>Fire, smoke and burglar alarms</p>	<p>Visually inspected.</p> <p>No tests whatsoever were carried out to any systems or appliances.</p> <p>Smoke detectors are located in the ground floor entrance hallway and bedroom and first floor landing.</p> <p>A heat detector is located in the kitchen.</p>

<p>Any additional limits to inspection</p>	<p>Our inspection for Japanese knotweed was not carried out.</p> <p>This is a planned which is subject to control regulation, is considered to be invasive and one which can render property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese knotweed within the boundaries of the property or its neighbouring property.</p> <p>Identification of Japanese knotweed is best undertaken by a specialist contractor. If it exists room must be undertaken any controlled manner by specialist contractors. This can prove to be expensive.</p> <p>No access was available to the loft voids, as these were concealed by wall and ceiling linings within the rooms in the roof.</p> <p>Asbestos based materials were commonly used in the construction industry up until the year 2000. There is therefore the opportunity for asbestos based materials to be part of any residential property built prior to that date.</p> <p>Parts of the property, which are covered, unexposed or and accessible, cannot be guaranteed to be free from defect.</p> <p>The property was occupied, fully furnished and all floors were covered. Floor coverings restricted my inspection of flooring.</p> <p>I was not able to inspected the subfloor area.</p> <p>My inspection of the roof covering was restricted from ground level and some parts were not visible.</p> <p>The flat roof coverings where not visible from ground level.</p>
--	--

## Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

## 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category:	1
Notes:	The property has been affected by previous movement but within the limitations of the inspection there was no evidence to suggest that this is ongoing.

Dampness, rot and infestation	
Repair category:	2
Notes:	<p>Damp staining was noted at ceiling height adjacent to the cupboard under the staircase in the lounge and at lower level of the wall.</p> <p>This area coincides with the central chimney stack, which is no longer used by the dwelling. A competent roofer/builder should be employed to inspect the condition of the chimney stack and associated lead flashings and carry out repairs as deemed necessary.</p> <p>The rear elevation PVC, double glazed external door in the lounge, has had silicone recently put in place at the threshold, and the carpet rolled back.</p> <p>Elevated moisture meter readings were recorded with a damp meter, at lower levels of the partition wall, adjacent to the ground floor shower room, within the ground floor bedroom.</p> <p>Concealed areas around the shower tray cannot be inspected however water spillage over a period of time can result in unexpected defects to hidden parts of the building fabric. Seals around the shower tray should be checked to verify if any penetrating damp is evident.</p> <p>Elevated moisture meter readings were taken with a damp meter adjacent to the left-hand side of the fireplace in the lounge.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Chimney stacks

Repair category:	2
Notes:	<p>Damp staining was noted at ceiling height adjacent to the cupboard under the staircase in the lounge and at lower level of the wall.</p> <p>This area coincides with the central chimney stack, which is no longer used by the dwelling. A competent roofer/builder should be employed to inspect the condition of the chimney stack and associated lead flashings and carry out repairs as deemed necessary.</p>

## Roofing including roof space

Repair category:	2
Notes:	<p>The flat timber and felt roof covering of the front right hand side dormer (when facing the front of the building) is of limited life expectancy.</p> <p>Ongoing maintenance will be required.</p> <p>No access was available to the loft voids, as these were concealed by wall and ceiling linings within the rooms in the roof.</p>

## Rainwater fittings

Repair category:	1
Notes:	<p>No significant defects evident.</p> <p>Weather conditions were dry at the time of inspection, thus restricting a full assessment of the effectiveness of the rainwater conductors.</p>

## Main walls

Repair category:	1
Notes:	<p>No significant defects evident.</p> <p>Hairline cracks were noted at the external elevations.</p>

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Windows, external doors and joinery

Repair category:	2
Notes:	<p>External joinery including window frames are affected by decay to varying degrees. A reputable joiner can advise on all necessary repairs.</p> <p>The rear elevation PVC, double glazed external door in the lounge, has had silicone recently put in place at the threshold, and the carpet rolled back.</p> <p>This appears to be the result of a previous leak, and should be monitored.</p>

## External decorations

Repair category:	2
Notes:	<p>Flaking/peeling paint was noted at lower levels of the rear sunroom brick walls.</p> <p>Regular repainting of external joinery will prolong its lifespan.</p>

## Conservatories / porches

Repair category:	
Notes:	N/A.

## Communal areas

Repair category:	
Notes:	N/A.

## Garages and permanent outbuildings

Repair category:	2
Notes:	The flat timber and felt roof covering over the rear brick stores is of limited life expectancy. Ongoing maintenance will be required.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Outside areas and boundaries

Repair category:	1
Notes:	Garden grounds and boundaries will require regular ongoing maintenance.

## Ceilings

Repair category:	1
Notes:	No significant defects evident.

## Internal walls

Repair category:	1
Notes:	No significant defects evident.

## Floors including sub-floors

Repair category:	2
Notes:	Subfloor ventilation appears inadequate. A reputable timber/damp specialist can carry out a check of the subfloor area and advise on improved ventilation.  I was not able to inspect the subfloor area.

## Internal joinery and kitchen fittings

Repair category:	1
Notes:	Kitchen base and wall units are a little dated, although functional.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Chimney breasts and fireplaces

Repair category:	2
Notes:	<p>Elevated moisture meter readings were taken with a damp meter adjacent to the left-hand side of the fireplace in the lounge, with a damp stain evident.</p> <p>A solid fuel stove has been installed and the ground floor lounge. It is assumed that the installation complies with the building standards.</p>

## Internal decorations

Repair category:	1
Notes:	<p>No significant defects evident.</p> <p>Some redecoration is envisaged.</p>

## Cellars

Repair category:	
Notes:	N/A.

## Electricity

Repair category:	2
Notes:	<p>It is recommended that all electrical installations be checked every five years or on change of ownership to keep up-to-date with frequent changes in safety regulations. Further advice will be available from a qualified NICEIC/SELECT registered contractor. It should be appreciated that only recently constructed or rewired properties will have installations watchfully comply with IET regulations.</p> <p>There is no evidence of recent testing of the electrical system. A competent electrical contractor should be instructed to test the system and carry out any necessary repairs/upgrading.</p>

## Gas

Repair category:	
Notes:	N/A.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

## Water, plumbing and bathroom fittings

Repair category:	2
Notes:	<p>Elevated moisture meter readings were recorded with a damp meter, at lower levels of the partition wall, adjacent to the ground floor shower room, within the ground floor bedroom.</p> <p>Concealed areas around the shower tray cannot be inspected however water spillage over a period of time can result in unexpected defects to hidden parts of the building fabric. Seals around the shower tray should be checked to verify if any penetrating damp is evident.</p>

## Heating and hot water

Repair category:	1
Notes:	<p>It is assumed that the heating and hot water systems have been properly serviced and maintained on a regular basis and installed in accordance with the relevant regulations.</p> <p>The most recent date of servicing should be confirmed, prior to making a commitment to purchase. If a satisfactory servicing within the past 12 months cannot be proven, then the heating system should be tested and serviced by a Oftec oil registered contractor prior to a change of occupancy.</p>

## Drainage

Repair category:	1
Notes:	From the surface, no evidence of defects were noted.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

<b>Structural movement</b>	1
<b>Dampness, rot and infestation</b>	2
<b>Chimney stacks</b>	2
<b>Roofing including roof space</b>	2

<b>Drainage</b>	1

## Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

## Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

### 3. ACCESSIBILITY INFORMATION

#### Guidance Notes on Accessibility Information

**Three steps or fewer to a main entrance door of the property:** In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

**Unrestricted parking within 25 metres:** For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground Floor and First Floor.
2. Are there three steps or fewer to a main entrance door of the property?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
3. Is there a lift to the main entrance door of the property?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
4. Are all door openings greater than 750mm?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
5. Is there a toilet on the same level as the living room and kitchen?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
6. Is there a toilet on the same level as a bedroom?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
7. Are all rooms on the same level with no internal steps or stairs?	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO

## 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

### Matters for a solicitor or licensed conveyancer

The property originally formed to small cottages, which have now been amalgamated into one dwelling, and altered and extended. It is assumed all necessary local authority and other consents were obtained for alterations and the appropriate documentation, including building warrants and completion certificates issued.

The rear garden ground has an area of potential flood risk, around the small burn/stream, although there is no record of any flooding affecting the dwelling. The market valuation reported assumes that the property is not been affected by flooding. The purchaser should satisfy themselves in this regard.

There appears to be a shared pedestrian access to the rear. The completing conveyancer should verify rights of access and liability in respect of future maintenance.

The road and pavement to the front of the property is understood to be public and maintained by the local authority.

The estimated reinstatement cost is £480,000.

It should be noted this sum is an estimate calculated by using a ratepayer square metre based on information provided by building cost information service (BCIS).

The market value of the property as described in this report is to hundred and £240,000.

This figure assumes vacant possession and that the property is unaffected by any adverse planning permissions, onerous burdens, title restrictions or servitude rights.

### Estimated re-instatement cost (£) for insurance purposes

£480,000.

Four Hundred and Eighty Thousand Pounds.

### Valuation (£) and market comments

£240,000.

Two Hundred and Forty Thousand Pounds.

# MORTGAGE VALUATION REPORT

---

Includes a market valuation of the property.

### Mortgage Valuation Report

Property:	33 Kirkland Street Dalry, Castle Douglas DG7 3UX	Executry of Mrs. Alice Ferguson  Tenure: Absolute ownership.
Date of Inspection:	10/11/2025	Reference: CD/25/994.

*This report has been prepared as part of the seller's instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising a potential lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.*

#### 1.0 LOCATION

The property is situated within Kirkland Street in the village of Dalry, similar type and age properties are adjacent. The property fronts onto Kirkland Street, with a small parking area to the immediate front and good size rear garden ground. Dalry is a small village which offers limited local facilities, more substantial facilities and amenities are available in the town of Castle Douglas, approximately 16 miles to the south.

#### 2.0 DESCRIPTION 2.1 Age: Circa 1875.

The subjects comprise a semi-detached, one and a half storey , extended dwelling house.

#### 3.0 CONSTRUCTION

Roofs: The main roofs to the dwelling are of pitched design, timber framed and slated. The ridges are stone/tiled.

There are two dormer windows on the front elevation and one done window at the rear elevation.

The left-hand side front elevation dormer (when facing the front of the dwelling) and rear elevation dormer are clad in fibreglass. The right-hand side front elevation dormer is flat timber and felt.

Main Walls: The main walls of the original dwelling are of solid stone construction, approximately 600 mm thick, externally pointed and painted and internally lined with lath and plaster/plasterboard, plastered stone/brick.

Floors: suspended timber/solid concrete.

#### 4.0 ACCOMMODATION

The accommodation comprises:

Ground floor: front entrance hallway, bedroom, shower room, kitchen, (open plan with rear sunroom), lounge.

First floor: Landing, bathroom, bedroom.

(There is an attic floor hobby/bedroom above the lounge, with staircase access).

<b>5.0</b>	<b>SERVICES (No tests have been applied to any of the services)</b>						
------------	---	--	--	--	--	--	--

<b>Water:</b>	Mains.	<b>Electricity:</b>	Mains.	<b>Gas:</b>	None.	<b>Drainage:</b>	Mains.
<b>Central Heating:</b>	Full Oil.						

<b>6.0</b>	<b>OUTBUILDINGS</b>
------------	---------------------

<b>Garage:</b>	None.
----------------	-------

<b>Others:</b>	There are two brick stores in the rear garden, with flat timber and felt roofs.
----------------	---

<b>7.0</b>	<b>GENERAL CONDITION</b> - <i>A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.</i>
------------	--

The property is of traditional construction and materials, works of ongoing repair, maintenance and some refurbishment are required.

It forms suitable security for normal mortgage purposes.

<b>8.0</b>	<b>ESSENTIAL REPAIR WORK</b> <i>(as a condition of any mortgage or, to preserve the condition of the property)</i>
------------	--

None.

<b>8.1 Retention recommended:</b>	£0.
-----------------------------------	-----

<b>9.0</b>	<b>ROADS &amp; FOOTPATHS</b>
------------	------------------------------

Made up and adopted.

<b>10.0</b>	<b>BUILDINGS INSURANCE (£):</b>	£480,000.	<b>GROSS EXTERNAL FLOOR AREA</b>	Approximately 162 m <sup>2</sup> (including habitable space in the attic floor accommodation above 1.5m in height)*.	<b>Square metres</b>
-------------	---------------------------------	-----------	----------------------------------	--	----------------------

*This figure is an opinion of an appropriate sum for which the property and substantial outbuildings should be insured against total destruction on a re-instatement basis assuming reconstruction of the property in its existing design and materials. Furnishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during re-construction and no allowance has been made for VAT, other than on professional fees. Further discussions with your insurers is advised.*

<b>11.0</b>	<b>GENERAL REMARKS</b>
-------------	------------------------

The property originally formed to small cottages, which have now been amalgamated into one dwelling, and altered and extended. It is assumed all necessary local authority and other consents were obtained for alterations and the appropriate documentation, including building warrants and completion certificates issued.

The rear garden ground has an area of potential flood risk, around the small burn/stream, although there is no record of any flooding affecting the dwelling. The market valuation reported assumes that the property is not been affected by flooding. The purchaser should satisfy themselves in this regard.

There appears to be a shared pedestrian access to the rear. The completing conveyancer should verify rights of access and liability in respect of future maintenance.

The road and pavement to the front of the property is understood to be public and maintained by the local authority.

The estimated reinstatement cost is £480,000.

It should be noted this sum is an estimate calculated by using a ratepayer square metre based on information provided by building cost information service (BCIS).

The market value of the property as described in this report is to hundred and £240,000.

This figure assumes vacant possession and that the property is unaffected by any adverse planning permissions, onerous burdens, title restrictions or servitude rights.

The property offers good size accommodation, within a pleasant village location, with an open aspect to the rear.

Works of ongoing maintenance and repair are required.

It is of a type for which an ongoing demand exists.

<b>12.0</b>	<b>VALUATION</b> <i>On the assumption of vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights. It is assumed that all necessary Local Authority consents, which may have been required, have been sought and obtained. No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns then they should ask for a specialist to undertake appropriate tests.</i>

# Energy Performance Certificate (EPC)

# Scotland

Dwellings

33 KIRKLAND STREET, ST JOHNS TOWN OF DALRY, CASTLE DOUGLAS, DG7 3UX

**Dwelling type:** Semi-detached house  
**Date of assessment:** 10 November 2025  
**Date of certificate:** 22 November 2025  
**Total floor area:** 119 m<sup>2</sup>  
**Primary Energy Indicator:** 303 kWh/m<sup>2</sup>/year

**Reference number:** 6090-5600-0222-8191-1953  
**Type of assessment:** RdSAP, existing dwelling  
**Approved Organisation:** Elmhurst  
**Main heating and fuel:** Boiler and radiators, oil

## You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£7,698	See your recommendations report for more information
Over 3 years you could save*	£2,178	

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

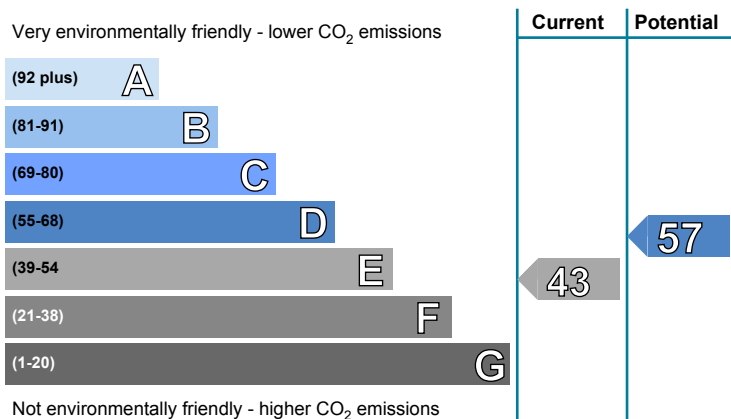

## Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (46)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (43)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

## Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Cavity wall insulation	£900 - £1,500	£177.00
2 Internal wall insulation	£7,500 - £11,000	£1359.00
3 Floor insulation (solid floor)	£5,000 - £10,000	£453.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit [greenerscotland.org](http://greenerscotland.org) or contact Home Energy Scotland on 0808 808 2282.

**THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE**

## Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Granite or whin, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
	Cavity wall, as built, no insulation (assumed)	★★☆☆☆	★★☆☆☆
Roof	Pitched, insulated (assumed)	★★★☆☆	★★★☆☆
	Roof room(s), limited insulation (assumed)	★★☆☆☆	★★☆☆☆
Floor	Solid, no insulation (assumed)	—	—
Windows	Multiple glazing throughout	★★★☆☆	★★★☆☆
Main heating	Boiler and radiators, oil	★★★☆☆	★★★☆☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★☆	★★★★☆
Secondary heating	Room heaters, dual fuel (mineral and wood)	—	—
Hot water	From main system	★★★☆☆	★★★☆☆
Lighting	Below average lighting efficiency	★★☆☆☆	★★☆☆☆

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 70 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 8.3 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.4 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

## Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£6,168 over 3 years	£4,212 over 3 years	
Hot water	£1,086 over 3 years	£1,089 over 3 years	
Lighting	£444 over 3 years	£219 over 3 years	
<b>Totals</b>	<b>£7,698</b>	<b>£5,520</b>	

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

## Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures	Indicative cost	Typical saving per year	Rating after improvement	
			Energy	Environment
1 Cavity wall insulation	£900 - £1,500	£59	E 47	E 44
2 Internal wall insulation	£7,500 - £11,000	£453	D 57	E 52
3 Floor insulation (solid floor)	£5,000 - £10,000	£151	D 60	D 56
4 Low energy lighting for all fixed outlets	£210 - £245	£63	D 61	D 56
5 Solar photovoltaic panels, 2.5 kWp	£8,000 - £10,000	£228	D 65	D 57

### Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

- External insulation with cavity wall insulation

## Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to [www.greenerscotland.org](http://www.greenerscotland.org).

## About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Cavity wall insulation

Cavity wall insulation, to fill the gap between the inner and outer layers of external walls with an insulating material, reduces heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. The insulation material is pumped into the gap through small holes that are drilled into the outer walls, and the holes are made good afterwards. As specialist machinery is used to fill the cavity, a professional installation company should carry out this work, and they should carry out a thorough survey before commencing work to ensure that this type of insulation is suitable for this home and its exposure. They should also provide a guarantee for the work and handle any building standards issues. Further information about cavity wall insulation and details of local installers can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)).

### 2 Internal wall insulation

Internal wall insulation involves adding a layer of insulation to the inside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. Further information can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)).

### 3 Floor insulation (solid floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulating solid floors can present challenges; insulation laid on top of existing solid floors may impact on existing doors and finishes whilst lifting of a solid floor to insert insulation below will require consideration of the potential effect on both structural stability and damp proofing. It is advised to seek advice from a Chartered Structural Engineer or a registered Architect about this if unsure. Further information about floor insulation is available from many sources including [www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation](http://www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation). Building regulations generally apply to this work and may also require a building warrant so it is best to check with your local authority building standards department.

### 4 Low energy lighting

Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (<http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting>).

### 5 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

## Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

## Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit <https://energysavingtrust.org.uk/energy-at-home> for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	21,285.14	N/A	N/A	N/A
Water heating (kWh per year)	3,947.97			

## Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

## About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst ([www.elmhurstenergy.co.uk](http://www.elmhurstenergy.co.uk)), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk) and entering the report reference number (RRN) printed at the top of this page.

Assessor's name:	Mr. John Kempself
Assessor membership number:	EES/018212
Company name/trading name:	Allied Surveyors Scotland Ltd
Address:	35 Buccleuch Street Dumfries DG1 2AB
Phone number:	01387 254 424
Email address:	<a href="mailto:dumfries@alliedsurveyorsscotland.com">dumfries@alliedsurveyorsscotland.com</a>
Related party disclosure:	No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

## Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk), with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at [www.gov.scot/epc](http://www.gov.scot/epc).

## Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit [greener-scotland.org](https://www.greener-scotland.org) or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.
