GRAHAM + SIBBALD

Home Report

Energy Performance Certificate (EPC)

Dwellings

Scotland

SUNFIELD COTTAGE, INCHMARLO, BANCHORY, AB31 4AT

Dwelling type: Detached house
Date of assessment: 06 October 2023
Date of certificate: 10 October 2023

Total floor area: 221 m²

Primary Energy Indicator: 292 kWh/m²/year

Reference number: 9150-2896-3100-2307-0665 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

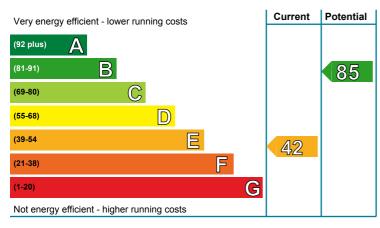

Main heating and fuel: Boiler and radiators, oil

You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£14,022	See your recommendations
Over 3 years you could save*	£6,198	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

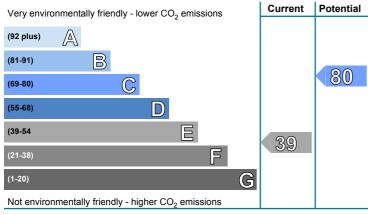

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (42)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (39)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Room-in-roof insulation	£1,500 - £2,700	£3753.00
2 Internal or external wall insulation	£4,000 - £14,000	£786.00
3 Floor insulation (solid floor)	£4,000 - £6,000	£567.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental	
Walls Granite or whinstone, as built, insulated (assumed)		****	★★★☆	
	Solid brick, as built, insulated (assumed)	★★★★☆	★★★★ ☆	
	Timber frame, as built, insulated (assumed)	★★★★ ☆	★★★★☆	
Roof	Pitched, insulated (assumed)	****	★★★ ☆	
	Roof room(s), no insulation (assumed)	****	****	
Floor	Solid, no insulation (assumed)	_	_	
	Solid, limited insulation (assumed)	_	_	
	To unheated space, insulated (assumed)	_	_	
Windows	Fully double glazed	***	***	
Main heating	Boiler and radiators, oil	***	***	
Main heating controls	Programmer, TRVs and bypass	***	***	
Secondary heating	Room heaters, wood logs	_	_	
Hot water	From main system	★★★☆☆	★★★ ☆☆	
Lighting	Low energy lighting in all fixed outlets	****	****	

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO_2 emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 70 kg $CO_2/m^2/yr$.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 15 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 9.6 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£12,483 over 3 years	£6,672 over 3 years	
Hot water	£825 over 3 years	£438 over 3 years	You could
Lighting	£714 over 3 years	£714 over 3 years	save £6,198
Tota	s £14,022	£7,824	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving	Rating after improvement	
		indicative cost	per year	Energy	Environment
1	Room-in-roof insulation	£1,500 - £2,700	£1251	D 58	E 53
2	Internal or external wall insulation	£4,000 - £14,000	£262	D 61	D 56
3	Floor insulation (solid floor)	£4,000 - £6,000	£189	D 64	D 59
4	Upgrade heating controls	£350 - £450	£153	D 66	D 62
5	Replace boiler with new condensing boiler	£2,200 - £3,000	£140	D 68	D 64
6	Solar water heating	£4,000 - £6,000	£71	C 69	D 66
7	Solar photovoltaic panels, 2.5 kWp	£3,500 - £5,500	£579	C 74	C 70
8	Wind turbine	£15,000 - £25,000	£1313	B 85	C 80

Choosing the right improvement package

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Room-in-roof insulation

Insulating roof rooms will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. If it has a flat ceiling insulation can usually be added above the ceiling, and sloping ceilings and walls of roof rooms can be insulated using an internal lining board. Roof voids must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about roof room insulation and details of local contractors can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). Building regulations generally apply to this work so it is best to check this with your local authority building standards department.

2 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that a building warrant is required for the installation of external wall insulation. Planning permission may also be required and that building regulations apply to external insulation so it is best to check with your local authority on both issues.

3 Floor insulation (solid floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulating solid floors can present challenges; insulation laid on top of existing solid floors may impact on existing doors and finishes whilst lifting of a solid floor to insert insulation below will require consideration of the potential effect on both structural stability and damp proofing. It is advised to seek advice from a Chartered Structural Engineer or a registered Architect about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work and may also require a building warrant so it is best to check with your local authority building standards department.

4 Heating controls (room thermostat)

The heating system should have a room thermostat to enable the boiler to switch off when no heat is required. A competent heating engineer should be asked to do this work. Insist that the thermostat switches off the boiler as well as the pump and that the thermostatic radiator valve is removed from any radiator in the same room as the thermostat. Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

5 Condensing boiler

A condensing boiler is capable of much higher efficiencies than other types of boiler, meaning it will burn less fuel to heat this property. This improvement is most appropriate when the existing central heating boiler needs repair or replacement, however there may be exceptional circumstances making this impractical. Condensing boilers need a drain for the condensate which limits their location; remember this when considering remodelling the room containing the existing boiler even if the latter is to be retained for the time being (for example a kitchen makeover). Building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority building standards department and seek advice from a qualified heating engineer.

6 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

7 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

8 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present:

Biomass secondary heating

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	41,274	(257)	N/A	(2,311)
Water heating (kWh per year)	2,918			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Email address: aberdeen@g-s.co.uk
Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

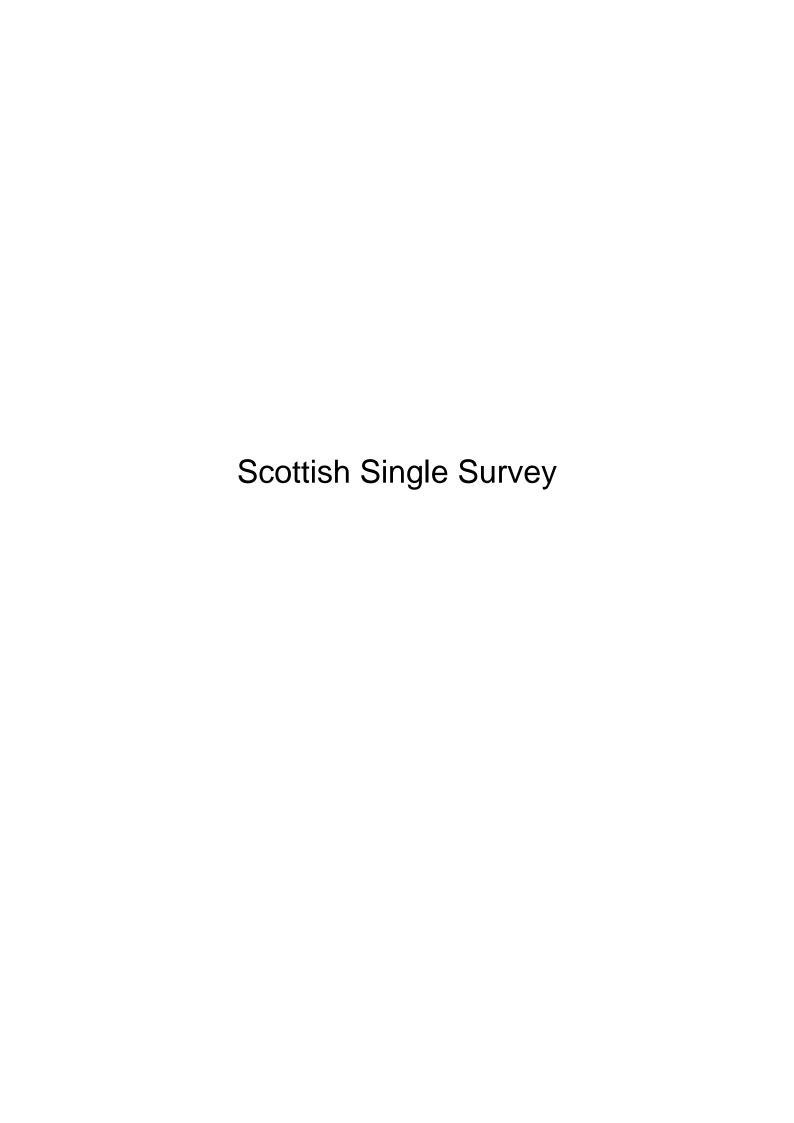

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

survey report on:

Property address	SUNFIELD COTTAGE INCHMARLO BANCHORY AB31 4AT
Customer	Mr Neil Watt
	Flat F 25 Seaforth Road Aberdeen AB24 5PW
Prepared by	Graham & Sibbald
Date of inspection	6th October 2023

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report ² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	Detached two storey extended cottage.
Accommodation	Ground Floor - Entrance Hallway, Living Room, Sitting Room, Family Room, Kitchen with Open Plan Dining Room, Utility Room, Toilet First Floor - Landing, Master Bedroom with Dressing Room and En-Suite Shower Room, Three further Bedrooms, Bathroom, Study.
Gross internal floor area (m²)	221 or thereby.
Neighbourhood and location	The property is located on an elevated site within a cluster of properties adjacent to the A93, lying on the outskirts of the town of Banchory, where surrounding properties are of a mixed age and style. Adequate range of facilities and amenities may be found within Banchory.
Age	Erected circa 1850 and later extended.
Weather	Clear and dry.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate. Single chimney stack of stone construction, roughcast externally with cement flashings, stone cope and pot bed in cement haunching.

Roofing including roof space

Sloping roofs were visually inspected with the aid of binoculars where appropriate.

Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.

Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property.

If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.

The roof over the original house is partly pitched and slated with traditional pitched and slated dormer window projection to the frontage. The central section between the original house and extension incorporates a flat platform roof which appears to be clad in a waterproof membrane. There is a conical feature section of roof which is clad in slates. The roof over the single storey projection to the gable is pitched and clad in slates. Due to the nature of the extension, there are no roof areas to the original sections. Access was gained to the roof space over the Family Room via the ceiling hatch. The roof is framed with timber joists and rafters overlaid with timber board sarking. There is evidence of roofing felt beneath the slates. Insulation has been placed between the ceiling joists.

Rainwater fittings

Visually inspected with the aid of binoculars where appropriate.

PVC gutters and downpipes discharging into the drainage system.

Main walls

Visually inspected with the aid of binoculars where appropriate.

Foundations and concealed parts were not exposed or inspected.

The walls to the original house are of solid stone construction, rendered and pointed externally. The walls to the extension appear to of traditional concrete block construction, rendered externally. The rear section of the extension and dormer are of a timber frame construction clad in timber weather boarding.

Windows, external doors and joinery

Internal and external doors were opened and closed where keys were available.

Random windows were opened and closed where possible.

Doors and windows were not forced open.

The windows are mostly of a double glazed, timber casement type although the double glazed timber casement roof lights have been incorporated within the first floor accommodation. There is a feature full height window within the Master Bedroom. The entrance doors are of timber double glazed design. The first floor of the extension is finished in timber weather boarding and

	soffits/fascias are also formed in timber.
External decorations	Visually inspected.
	Painted/stained timbers. External walls have been whitewashed.
Conservatories / porches	None.
Г <u>а</u>	T.,
Communal areas	None.
Garages and permanent outbuildings	Visually inspected.
	Double integral car garage. Power and water is provided to the garage. Walls and ceilings have been plasterboard sheet lined. Vehicular access is gained via an electric door.
Outside areas and boundaries	Visually inspected.
outside areas and boundaries	The property occupies a large sloping site, which the seller has advised extends to approximately 1.9 acres. The property lies to the north of the A93 and is accessed by the main road by means of a tarred surface driveway. There is an area of patio and raised timber decking to the front elevation. The remaining grounds are generally laid to grass with mature trees and planted areas. Where defined, boundaries are formed in post and wire fencing and masonry walls.
Ceilings	Visually inspected from floor level.
	Plasterboard sheet lined.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	Internal walls and partitions are of plasterboard sheet design on timber framing.
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point. Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor
	joists and the solum as determined from the access hatch. Floors at ground floor level appear to be of solid design overlaid with fitted and fixed floor coverings. Flooring at first floor level appears to be of suspended timber construction overlaid with fitted and fixed floor coverings.

Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Internal doors are of timber panel and timber glazed design with associated frames and skirtings. Access to the first floor accommodation is via a timber enclosed staircase with timber hand rail. Kitchen and Utility Room comprise a range of wall, tall and base units with integrated appliances and polished stone work surfaces in the Kitchen.
Chimney breasts and fireplaces	Visually inspected.
	No testing of the flues or fittings was carried out.
	Chimney breasts are of stone construction. Contained within the Living Room is a cast iron wood burning stove.
Internal decorations	Visually inspected.
	Paint or paper finishes with areas of wet wall panelling and wall tiling.
Cellars	Visually inspected where there was a safe and purpose-built access.
	None.
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.
	Mains supply. The electrical apparatus is located in the toilet cupboard. Where observed, PVC sheath cabling to 13 amp socket outlets.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.
	There is no gas supply to the property.

Water, plumbing, bathroom fittings Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation. No tests whatsoever were carried out to the system or appliances. Mains water supply. Plumbing and fittings are of PVC and copper piping where seen. Bathroom fittings comprise a WC, wash hand basin and spa style bath with shower cubicle. En-Suite fittings comprise a WC, wash hand basin and Shower compartment with mixer shower fitting. There is a two piece suite in the Cloakroom. Heating and hot water Accessible parts of the system were visually inspected apart from communal systems, which were not inspected. No tests whatsoever were carried out to the system or appliances. Central heating is via a 'Boulter Camray' boiler located in the Utility Room which serves steel panel hot water radiators with thermostatic valves. There is a case and vented hot water cylinder located in the first floor Hallway. Drainage Drainage covers etc. were not lifted. Neither drains nor drainage systems were tested. We understand drainage discharges into a private septic tank located within the site. Fire, smoke and burglar alarms Visually inspected. No tests whatsoever were carried out to the system or appliances. New smoke alarm standards were introduced in Scotland in February 2022 and it is likely that some properties may require additional works to meet these standards. In instances where alarms are in place, no tests whatsoever have been carried out and we cannot confirm if the system complies with the most recent regulations. Any potential purchaser should satisfy themselves as to whether the current system meets with regulations or otherwise. Any additional limits to inspection For flats / maisonettes Only the subject flat and internal communal areas giving access to the flat were inspected. If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no

defects that will have a material effect on the valuation.

The building containing the flat, including any external

the surveyor is able to give an opinion on the general

condition and standard of maintenance.

communal areas, was visually inspected only to the extent that

The property was fully furnished and had fitted and fixed floor coverings throughout at the time of inspection with cupboards/wardrobes full of stored personal items which restricted the internal investigation. The Study was full of stored personal items at the time of inspection. No access was gained to any roof timbers to the original part of the property. Access to the roof space above the Sitting Room was restricted by timbers and insulation. No inspection was possible to the flooring timbers beneath the bath or shower compartments. Not all windows were tested at the time of inspection. It is outwith the scope of this inspection to determine whether or not asbestos based products are present within the property. Asbestos was widely used in the building industry until around 1999, when it became a banned substance. If you have any concerns you should engage the services of a qualified asbestos surveyor. No inspection for Japanese Knotweed was carried out and unless otherwise stated for the purpose of this report, it is assumed that there is no Japanese Knotweed within the boundaries of the property or in neighbouring properties. It should be appreciated that the Home Report inspection is a non-disruptive visual inspection of the property as at the date of inspection and that we are unable to inspect parts of the property which are concealed or covered by floor coverings or contents in place at that time. Once vacant, defects may be apparent that could not be detected during our survey. Changing weather conditions can also affect aspects of the property which would not be apparent at the time of inspection.

Sectional Diagram showing elements of a typical house

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	There is evidence of settlement in the building noted both internally and externally but this is not inconsistent with a property of this age and type and on the basis of a single inspection appears to be longstanding.

Dampness, rot and infestation	
Repair category	2
Notes	Woodworm infestations were evident to roof timbers. Enquiries should be made as to whether any treatment works have been carried out in this respect in the past. In the absence of a guaranteed covering, the property should be inspected further be a reputable firm of timber specialists to confirm the infestation is dormant or to carry out any necessary remedial repairs. Localised dampness was recorded to the ceiling of a front Bedroom.

Chimney stacks	
Repair category	1
Notes	Slight twisting of the chimney stack was noted caused by historic movement.

Roofing including roof space	
Repair category	2
Notes	The side east most roof was reclad circa 2022. Any guarantees should be obtained. There is water ponding on the flat sections of roofing. Flat roofs have an unpredictable lifespan and can fail without warning, at which time repair or replacement will be required. A number of chipped and broken slates were evident. It should be appreciated that this type of roof covering will require ongoing and regular maintenance.

Rainwater fittings	
Repair category	1
Notes	Due to the wooded nature of the surroundings, the guttering will require regular clearance.

Main walls	
Repair category	1
Notes	There is a high ground level to the rear of the property. We understand that the Seller has installed a damp proof membrane within the Family Room to prevent lateral damp penetration.

Windows, external doors and joinery	
Repair category	1
Notes	Windows can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance/ repair will be required as part of an ongoing maintenance programme.

External decorations	
Repair category	1
Notes	The external decorations are generally in fair order. Regular repainting will be required if these areas are to be maintained in satisfactory condition.

Conservatories/porches	
Repair category	-
Notes	None.

Communal areas	
Repair category	-
Notes	None

Garages and permanent outbuildings	
Repair category	1
Notes	The garage generally appears in fair condition consistent with age and usage.

Outside areas and boundaries	
Repair category	2
Notes	There is a loose hand rail at the patio adjacent to the timber deck. Weathering was seen to the timber deck and there was also a slight deterioration to the supporting posts. There are a number of uneven and cracked patio slabs. There is a retaining wall and embankment to the rear of the property. This will require monitored on an ongoing basis for any signs of movement. There are mature trees in proximity to the property. These should be monitored on a regular basis as any damaged or overgrown trees could cause damage to the property, particularly in adverse weather.

Ceilings	
Repair category	1
Notes	The odd taped joint and shrinkage crack was evident.

Internal walls	
Repair category	1
Notes	There were visible sections of taping to plasterboard wall finishes. There is a provision of a vented tumble dryer in the Utility Room.

Floors including sub-floors	
Repair category	1
Notes	The odd creaky area of flooring was evident. Sections of flooring in the Family Room at ground floor level are uneven.

Internal joinery and kitchen fittings	
Repair category	1
Notes	General wear and tear was evident commensurate with age, type and usage. It cannot be confirmed whether the glazed units to the internal doors are fitted with toughened safety glass.

Chimney breasts and fireplaces	
Repair category	1
Notes	It is assumed that the wood/multi fuel apparatus has been installed in accordance with the manufacturer's recommendations in particular regard to flueing and ventilation. The appliance was not tested.

Internal decorations	
Repair category	1
Notes	The property was found to be freshly decorated.

Cellars	
Repair category	-
Notes	None.

Electricity	
Repair category	2
Notes	The electrical fusebox has been replaced with a circuit breaker unit, although signage indicates that the electrics have not been tested since 1993. The Institution of Engineering and Technology recommends that inspections and testing are undertaken at least every ten years and on a change of occupancy. It should be appreciated that only the most recently constructed or re-wired properties will have installations which fully comply with IET regulations.

Gas	
Repair category	-
Notes	None.

Water, plumbing and bathroom fittings		
Repair category	1	
Notes	There is slight staining to the seal surrounding the En-Suite shower compartment. It should be appreciated that concealed areas beneath and around baths and shower trays could not be inspected. Water spillage in these areas can result in dampness/decay and no comment can be made on inaccessible areas. Waterproof seals in sanitary areas should be checked and maintained on a regular basis.	

Heating and hot water		
Repair category	1	
Notes	The installation of the oil tank is unlikely to comply with current guidance, due to the proximity of the timber fencing. It is assumed that the central heating system functions satisfactorily and complies with the relevant regulations with particular regard to flueing and ventilation requirements. In the absence of recent servicing documentation, it is normally considered good practice to have the central heating system checked immediately upon taking occupation and serviced regularly thereafter.	

Drainage	
Repair category	1
Notes	Drainage is to a septic tank. This was not checked or tested. It should be ensured that appropriate registration documents are available.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	1

Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground & First Floors	
2. Are there three steps or fewer to a main entrance door of the property?	Yes X No	
3. Is there a lift to the main entrance door of the property?	Yes No X	
4. Are all door openings greater than 750mm?	Yes No X	
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No	
6. Is there a toilet on the same level as a bedroom?	Yes X No	
7. Are all rooms on the same level with no internal steps or stairs?	Yes No X	
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No	

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The property has been altered and extended at various points in the past. Our valuation is on the assumption that any alterations that have been carried out to the property satisfy all the relevant legislation and have full certification where appropriate. Drainage is to a private septic tank which we understand lies within the site and it is assumed that all necessary local requirements have been met. There is a timber pole in the garden grounds. It is assumed there are servitude rights in favour of the supplier and details of this should be clarified. The property is accessed via a shared driveway and it is assumed that adequate rights of access exist. We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate. Absolute Ownership assumed. We are unaware of any easements, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the Title Deeds. It is recommended that where repairs, defects or maintenance items have been identified interested parties make appropriate enquiries in order to satisfy themselves of potential costs and the extent of the works required prior to submitting a legal offer to purchase.

Estimated reinstatement cost for insurance purposes

The guidance figure is the estimate of costs for reinstating the subjects as at the date if inspection based on information provided by the Building Cost Information Service (BCIS). Building costs are currently increasing significantly above inflation due to increased demand and supply issues as a result of Brexit and the pandemic. It is recommended that this figure is kept under regular review to ensure that you have adequate insurance cover.

We are of the opinion that the subjects should be insured for buildings reinstatement purposes for a sum of not less than £850,000 (EIGHT HUNDRED AND FIFTY THOUSAND POUNDS STERLING).

Valuation and market comments

We are of the opinion that the market value of the subjects all as previously described and on a vacant possession basis would be fairly stated in the region of £550,000 (FIVE HUNDRED AND FIFTY THOUSAND POUNDS STERLING).

General Remarks

The property is located on an elevated site within a cluster of properties adjacent to the A93, lying on the outskirts of the town of Banchory, where surrounding properties are of a mixed age and style. Adequate range of facilities and amenities may be found within Banchory. The subjects were found to be in a condition of repair commensurate with age and type. Whilst there are items in need of attention, these are no considered to be essential and can be attended to during the course of future routine maintenance. There is evidence of previous movement in the building. This is not inconsistent with a property of this age and type and on the basis of a single inspection, any movement appears to be longstanding and non-progressive. The property has been altered and extended at various points in the past. Our valuation is on the assumption that any alterations that have been carried out to the property satisfy all the relevant legislation and have full certification where appropriate. Drainage is to a private septic tank which we understand lies within the site and it is assumed that all necessary local requirements have been met. There is a timber pole in the garden grounds. It is assumed that there is a servitude right of access. The property is accessed via a shared driveway and it is assumed that adequate rights of access exist. We are unaware of any adverse planning proposals affecting the subjects although this should be confirmed by obtaining a Property Enquiry Certificate. Absolute Ownership assumed. We are unaware of any easements, servitudes or rights of way which may adversely affect the property. This point should be confirmed by reference to the Title Deeds. It is recommended that where repairs, defects or maintenance items have been identified interested parties make appropriate enquiries in order to satisfy themselves of potential costs and the extent of the works required prior to submitting a legal offer to purchase. Other Room - Utility Room.

questionnaire	

GRAHAM + SIBBALD

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership		
	How long have you owned the property? 12 years		
2.	Council tax		
	Which Council Tax band is your property in?		
3.	Parking		
	What are the arrangements for parking at your property? (Please tick all that apply)		
	• Garage Yes		
	Allocated parking space		
	• Driveway Yes		
	Shared parking		
	On street		
	Resident permit		
	Metered parking		
	Other (please specify):		
4.	Conservation area		
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	No	

5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	No
6.	Alterations/additions/extensions	
а.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	
	If you have answered yes, please describe below the changes which you have made:	Yes
	Converted the existing car port (located beneath the master bedroom) into a garage	
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	Yes
