Important Notice:

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto www.onesurvey.org (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.**

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

PART 1.

SINGLE SURVEY

A report on the condition of the property, with categories being rated from 1 to 3.

Single Survey

Prepared by	Nick Davis, MSc MRICS Kilmarnock - Allied Surveyors Scotland Ltd	

SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. ¹

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 \square

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

¹ Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller:
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

² Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- *There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- ➤ *There are no particularly troublesome or unusual legal restrictions;
- *There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a semi detached character extended two storey traditional house. We understand the front elevation of the property is "C" listed.
Accommodation	Ground floor - entrance hall, lounge, sitting room and open plan breakfasting kitchen, inner hallway, rear sunroom, and cloakroom with WC.
	Upper floor - landing, three bedrooms, inner hallway and open plan family bathroom with dressing area.
Gross internal floor area (m2)	177 sq. metres approximately.
Neighbourhood and location	The subjects are situated reasonably close to the outskirts of Stewarton town centre, occupying a semi-rural position, set off Old Kilmarnock Road, accessed via a shared driveway, which leads to the subject property and a small number of mixed style private properties thereafter.
	Surrounding occupiers are of both residential and agricultural/similar nature, with some industrial occupiers thereafter.
	A range of amenities and facilities are readily available within Stewarton, which also benefits from a train station.
Age	Originally constructed in 1787, extended, altered and adapted at various dates thereafter.
Weather	Dry and bright, with hard frost.
Chimney stacks	Chimneys are of brick and stone design, two of which have been reroughcast/rendered in recent times, topped by polygonal cans.
	Visually inspected with the aid of binoculars where required.

Roofing including roof space	The main roof is pitched, assumed to be timber framed and overlaid in slate, which has been overhauled at front elevation.
	There are synthetic/lead valleys and flashings, some of which are concealed.
	No attic space inspections were available, as only hatch visible was obscured by furniture within inner hallway at upper level. Understandably, we cannot comment further on areas covered or inaccessible being free from potential defect.
	At the rear of the property there is a flat felt/similar roof covering over the main bathroom.
	Thereafter there is a mono pitched and slate lined canopy projection over rear kitchen patio doors, supported by metal pillars.
	Sloping roofs were visually inspected with the aid of binoculars where required.
	Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.
	Flat roofs have a limited life and depending on their age and quality of workmanship can fail at any time.
	Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.
Rainwater fittings	Rainwater fittings are formed in a combination of parapet style components to front, with PVC and cast iron goods thereafter. Our sight of rainwater fittings was naturally limited.
	Visually inspected with the aid of binoculars where required.
Main walls	The main outer walls are formed in a combination of substantial solid stone and brick construction, with some assumed cavity construction thereafter. Outer walls are rendered and painted.
	Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.

Windows, external doors and joinery Windows are of mixed style predominantly replacement double glazed timber framed sash and casement design at front and side, with mixed style double glazed PVC window units thereafter. Entrance doors are traditional timber storm door design, with glazed inner door. At rear there is a timber pedestrian door at kitchen, and with double glazed PVC framed patio doors to rear thereafter. External and roof line joinery is predominantly of timber design. Internal and external doors were opened and closed where keys were available. Random windows were opened and closed where possible. Doors and windows were opened and closed where possible. Doors and windows were not forced open. External decorations Painted external render, masonry and cast iron rainwater fittings. External joinery is also painted and decorated. Visually inspected. Conservatories / porches There is a sunroom style projection at rear, with rendered brick outer walls, surmounted by a mono pitched, assumed timber framed and felt lined roof covering. The sunroom benefits from double glazed windows and "French" style doors. Visually inspected. Communal areas No garages or permanent outbuildings were noted. There is a greenhouse and potting shed. Visually inspected.		T T T T T T T T T T T T T T T T T T T

Visually inspected.	outbuildings	There is a greenhouse and potting shed.
		Visually inspected.

Outside areas and boundaries	The subjects incorporate a generous plot and associated grounds, understood to extend to around 1.63 acres in size.
	The property is accessed via a shared driveway, leading to a gravel circulation area at front, which features a decorative pond.
	The property benefits from front and rear garden grounds.
	In general terms boundaries are of timber and post and wire, with areas of solid stone walling at entrance and at left hand elevation.
	Grounds are overlaid in extensive areas of lawn, incorporating a variety of mature trees, shrubs and bushes, together with some immature and small trees.
	There is a ditch/water course out with boundary to side.
	Thereafter grounds incorporate areas of concrete hard standings, gravel and flower bed.
	Visually inspected.
Ceilings	Ceilings are of lath and plaster and plasterboard design, some of which have been finished with a textured coating.
	There is exposed decorative stonework to underside of spiral staircase within ground floor cloakroom/WC.
	There is a false ceiling within the inner corridor leading to the cloakroom WC. The electrical consumer unit is located within this void.
	Visually inspected from floor level.
Internal walls	Internal walls are formed in a combination of lath and plaster, plastered hard and plasterboard lined construction.
	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
Floors including sub floors	Flooring is of hybrid design at ground level, appearing to incorporate floated and suspended timber flooring, with some solid sections thereafter. Flooring at upper level is predominantly of suspended timber.
	No sub floor inspections were available.
	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.
	Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point.
	Physical access to the sub floor area may be taken if the Surveyor deems it is safe and reasonable to do so, and subject to a minimum clearance of 1m between the underside of floor joists and the solum as determined from the access hatch.
	1

	·
Internal joinery and kitchen fittings	Internal joinery and door surrounds are of mixed age and style, predominantly of a traditional timber design.
	There is a decorative solid stone staircase leading from ground to upper level, with metal and timber balustrade details.
	Kitchen fittings incorporate a contemporary range of wall and base mounted units featuring a stainless steel sink and a detached island/worktop detail.
	We understand that the range style cooker is connected to a mains gas supply.
	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
Chimney breasts and fireplaces	There is a decorative solid fuel stove within the lounge - no tests have been carried out.
	Visually inspected. No testing of the flues or fittings was carried out.
Internal decorations	Traditional paper, emulsion and tile finishes, together with decorative timber panelling and wall linings.
	Visually inspected.
Cellars	There are no cellars pertaining to the subjects.
Electricity	Mains electricity supply.
	The electrical installation incorporates circuit breakers arrangements and where visible exposed wiring is encased in both PVC and rubber connected to 13 amp power points, some of which are mixed style and lower set.
	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.
Gas	Mains gas supply - confirm.
	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances.
	Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.

1 ·
Mains water supply - confirm.
Plumbing where visible is of copper and PVC style.
Sanitary fittings to the ground floor cloakroom incorporate a modern WC and wash hand basin. We would highlight that the ceiling height and entrance door height is particularly low at this area.
Sanitary fittings to the upper main bathroom incorporate a corner bath, WC, wash hand basin and shower compartment.
Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.
No tests whatsoever were carried out to the system or appliances.
Space heating and hot water is provided via a modern wall mounted gas fired condensing combination boiler located within the kitchen. This serves water filled radiators to the main apartments and provides domestic hot water.
The heating system was not in operation at the time of inspection.
Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
No tests whatsoever were carried out to the system or appliances.
We understand drainage is to a shared septic tank, which is contained within subjects garden grounds.
Drainage covers etc were not lifted.
Neither drains nor drainage systems were tested.

Fire, smoke and burglar alarms

A number of ceiling mounted smoke detectors were noted.

Visually inspected.

No test whatsoever were carried out to any systems or appliances.

There is now a requirement in place for compliant interlinked fire, smoke and heat detectors in residential properties. The new fire smoke and alarm standard came into force in Scotland in February 2022, requiring a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also requires to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon fuelled appliance such as a boiler, open fire or wood burner etc. a carbon monoxide detector is also required.

The surveyor will only comment on the presence of a smoke detector etc. but will not test them, ascertain if they are in working order, interlinked and / or fully compliant with the fire and smoke alarm standard that was introduced in 2022.

We have for the purposes of the report, assumed the system is fully compliant, if not then the appropriate compliant system will required to be installed prior to sale. This of course should be confirmed by your legal advisor.

Any additional limits to inspection

No access was gained above ceiling linings or behind fixed timber goods or sanitary ware.

We have not tested all window/doors and associated handles to avoid excessive physical contact.

We have not tested any elements of the electrical, heating and plumbing system and it would be prudent to do so prior to purchase.

Due to ever changing climate conditions, it would therefore be prudent to conduct appropriate background checks with regard to potential flood risks in and around the area, by reference to SEPA flood map/similar.

No furniture, fixtures/fittings or breakable items were moved during the course of our inspection. It would be prudent to check behind/under prior to purchase.

Potential purchasers should satisfy themselves with regard to Fire Safety regulations and fire escape arrangements pertaining to the subject property, prior to purchase.

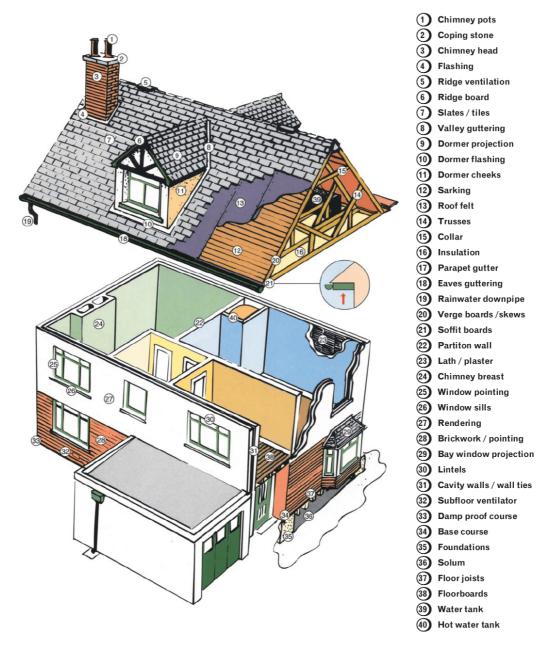

No attic space inspections were available.

An inspection for Japanese Knotweed was not carried out.

This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property.

Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the above 3 categories:

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement		
Repair category:		
Notes:	There is evidence of settlement/ movement, reflected in the form of some external masonry distortion, and render cracking, together with off plumb window and door arrangements and runs and dips to flooring, some of which are notable (particularly at upper level). However, on the basis of a single inspection movement noted would appear to be longstanding.	

Dampness, rot and infestation		
Repair category:	2	
Notes:	Localised positive moisture readings were obtained within the property, predominantly around lounge bay window timber panelling, and to mid wall at front upper right bedroom. Given the limitations to our inspection, together with stored items, it is unlikely that this list is exhaustive. Investigate and repair as necessary.	
	We are informed that timber and damp treatments were carried out in 2017/2018, with a 20 year guarantee. This document should be made available for transfer.	
	Given the age and style of the property, it would be prudent to obtain a precautionary report via a reputable and qualified specialist.	

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Chimney stacks	
Repair category:	2
Notes:	It is appreciated that two chimney stacks have been re-roughcast in recent times, displaying general wear, within the limitations of our inspection.
	Remaining exposed brick chimney stack incorporates wear and tear, open mortar joints and pockets of frost action.
	Current and routine maintenance expenditures should be anticipated, which will naturally increase over time.

Roofing including roof space	
Repair category:	2
Notes:	It is appreciated that front roof slope is understood to have been overhauled, and appears to be in generally fair condition.
	Thereafter roof slating is of mixed and older style, and incorporates a number of loose, slipped, cracked and misaligned components.
	Part of the roof is old, and we have not inspected the attic space. Properties of this age and style will require regular external roof maintenance and repair. It would be prudent to instruct a roofing contractor to provide further commentary on the condition of the roof.
	We have not had sight of the flat roof covering to rear, however, flat roof coverings have a more limited life span.

Rainwater fittings	
Repair category:	
Notes:	We understand that maintenance and repair has been carried out to rainwater fittings, predominantly at front elevation. We have not had sight of linings in this regard, and weather conditions were dry during our inspection. These areas should therefore be checked during periods of mixed and adverse weather. Thereafter general wear and tear was noted to joints and junctions.

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Main walls	
Repair category:	2
Notes:	Outer walls were found to be generally neat and tidy, however, incorporates some cracked, weathered and worn render, together with evidence of settlement. Routine maintenance expenditures should be anticipated.
	It is important that the metal support columns below rear canopy detail are monitored and maintained.

Windows, external doors and joinery	
Repair category:	2
Notes:	Windows and doors were of mixed age and style, and some outer frames incorporate softening and localised decay.
	Stiff handles and hinges were also noted.
	Maintenance/repair and localised upgrade is required.
	Condensation staining was noted to some areas, which naturally restricted our inspections.

External decorations	
Repair category:	
Notes:	Generally well presented, with areas of weathering and localised staining.

Conservatories / porches	
Repair category:	2
Notes:	A degree of wear and tear was noted throughout the sunroom style structure, which incorporates a lightweight style roof covering. Routine maintenance expenditures should be anticipated, naturally increasing over time.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Communal areas	
Repair category:	
Notes:	No internal communal circulation areas.

Garages and permanent outbuildings	
Repair category:	
Notes:	No garages or permanent outbuildings.

Outside areas and	Outside areas and boundaries	
Repair category:	2	
Notes:	Garden grounds were found to be generally neat and tidy, adequately tended and well presented.	
	Should children or pets be present edge protection may be required around the pond detail.	
	Some areas of damaged and leaning fencing were noted, requiring repair.	
	Stone walling displays typical evidence of wear and tear and localised misalignment, and will require maintenance and repair from time to time. This can be costly.	
	There are a variety of trees, shrubs and bushes within the feu, and these will require professional advice/treatment from time to time.	
	Understandably we have not walked the entirety of grounds and boundaries.	
	Given time of year and weather conditions, we were unable to conduct inspections with regard to Japanese Knotweed, and it would be prudent to instruct a specialist to confirm that there is no evidence of this plant within the curtilage or immediately surrounding areas.	

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Ceilings		
Repair category:	•	
Notes:	Localised plaster wear and tear and unevenness/misalignment noted, assumed to be capable of remedy throughout the course of selective redecoration and replastering.	
	Plasterwork of this age and style can become brittle when disturbed.	
	On occasion, textured coatings can contain asbestos components and should be handled with care.	

Internal walls	
Repair category:	
Notes:	Plaster wear and tear and localised misalignment evident, together with some areas that incorporate brittle plasterwork.
	Again plasterwork of this age and style become brittle when disturbed.

Floors including sub-floors	
Repair category:	2
Notes:	Most floors were found to be generally level and adequately supported, however, some loose and misaligned boards were noted at upper level, which require adjustment.
	Thereafter there is evidence of settlement, reflected in the form of notable runs and dips to flooring.

Internal joinery and kitchen fittings	
Repair category:	2
Notes:	Mixed age and style joinery items, some of which display a degree of user wear and tear.
	It is appreciated that the kitchen is of modern design, well presented.
	Some missing skirtings were noted within the property, predominantly at upper floor level, and these require reinstatement.

Category 3	Category 2	Category 1
to other parts of the property or cause a safety	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Chimney breasts and fireplaces		
Repair category:	1	
Notes:	Modern stove located within the lounge. It should be confirmed that the stove was installed in accordance with any necessary permissions, and in line with building regulations in force.	

Internal decorations	
Repair category:	
Notes:	The property was found to be in generally good decorative order, however, some unfinished paintwork was noted, and therefore selective redecoration is required.

Cellars	
Repair category:	
Notes:	There are no cellars pertaining to the subjects.

Electricity	
Repair category:	2
Notes:	It is appreciated that the installation incorporates a moder consumer unit, however, some older style and mixed aged wiring was noted thereafter. The system would not comply with current regulations in force, and advice should be obtained via a reputable and qualified electrician.

Gas	
Repair category:	
Notes:	No evidence is available to confirm recent testing or servicing. Failure to test the service regularly increases safety risks. Ideally a current test certificate should be made available.

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Water, plumbing and bathroom fittings				
Repair category:	2			
Notes:	It is appreciated that sanitary fittings are of mixed age and generally of modern design, however, positive moisture readings were obtained to floor behind ground floor cloakroom WC and around first floor bathroom WC, indicative of concealed localised leakage. Pipework should be tightened/repaired as necessary.			
	We have not tested any elements of the system and it would be prudent to do so prior to purchase.			

Heating and hot water				
Repair category:				
Notes:	Modern central heating boiler noted, which we understand has been regularly serviced.			
	Any supporting service or warranty documentation should be made available.			
	The system will require annual servicing/maintenance.			

Drainage					
Repair category:	1				
Notes:	We have not inspected or tested the system, and we understand that this is shared. It should be confirmed that rights of way exist for maintenance, and that all necessary SEPA/similar consents are in place.				
	The system will require maintenance and repair from time to time.				

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	2

Water, plumbing and bathroom fittings	2
Heating and hot water	1
Drainage	1

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. ACCESSIBILITY INFORMATION

Guidance Notes on Accessibility Information

<u>Three steps or fewer to a main entrance door of the property:</u> In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground and first.
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES []NO
3. Is there a lift to the main entrance door of the property?	[]YES [x]NO
4. Are all door openings greater than 750mm?	[]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES []NO
6. Is there a toilet on the same level as a bedroom?	[x]YES []NO
7. Are all rooms on the same level with no internal steps or stairs?	[]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES []NO

4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

The property has been subject to alteration, sub division and extension over time to provide current layout and footprint, and it is assumed that at one point the property was one large farmhouse. The kitchen has been made into an open plan area. A rear sunroom projection has been formed, and patio doors exist. This list may not be exhaustive.

It should be confirmed that all necessary Local Authority permissions, warrants and consents were obtained at the relevant dates.

We understand some elements of the property are both "C" listed, which will result in limitation on any future alterations that may be planned, and that the cost of maintenance and repair is likely to be at a higher level. Potential purchasers should satisfy themselves in this regard, and conduct background enquiries via Historic Scotland and the Local Authority.

We understand the access roadway is shared and it should be confirmed that appropriate rights of way exist, together with maintenance responsibilities. It was noted that a Scottish Power secondary sub station exists at the entrance driveway.

Confirm the exact extent of garden grounds, rights of way and boundaries by reference to Title Deeds.

The property is located within an area of known past coal mining activity, and therefore a mining report should be obtained as standard practice for properties in the general location.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

Estimated re-instatement cost (£) for insurance purposes

800,000 (guide figure for basic reconstruction purposes).

EIGHT HUNDRED THOUSAND POUNDS.

Valuation (£) and market comments

400,000

Taking current market conditions into account together with points detailed within our report we are of the opinion that the current market value of the heritable property is fairly stated in the capital sum of FOUR HUNDRED THOUSAND POUNDS.

Report author: Nick Davis, MSc MRICS

MORTGAGE VALUATION **REPORT**

Includes a market valuation of the property.

Mortgage Valuation Report					
Property:	High Peacockbank House Old Kilmarnock Road Stewarton, Kilmarnock KA3 5JG	Client: Mrs. Cl Tenure: Owne	aire Udal-Stewart rship		
Date of Inspection:	20/11/2025	Reference:	MA/0912		

This report has been prepared as part of the seller's instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising a potential lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

1.0 LOCATION

The subjects are situated reasonably close to the outskirts of Stewarton town centre, occupying a semi-rural position, set off Old Kilmarnock Road, accessed via a shared driveway, which leads to the subject property and a small number of mixed style private properties thereafter.

Surrounding occupiers are of both residential and agricultural/similar nature, with some industrial occupiers thereafter.

A range of amenities and facilities are readily available within Stewarton, which also benefits from a train station.

2.0	DESCRIPTION	2.1 Age:	Originally constructed in	
			1787, extended, altered	
			and adapted at various	
			dates thereafter.	

The subjects comprise a semi detached character extended two storey traditional house. We understand the front elevation of the property is "C" listed.

3.0 CONSTRUCTION

The outer walls are of solid stone and brick design, with assumed cavity construction at rear upper level extension and possibly sun room.

The roof is pitched, assumed to be timber framed and overlaid in slate, with flat felt section at rear.

4.0 ACCOMMODATION

Ground floor - entrance hall, lounge, sitting room and open plan breakfasting kitchen, inner hallway, rear sunroom, and cloakroom with WC.

Upper floor - landing, three bedrooms, inner hallway and open plan family bathroom with dressing area.

5.0 SERVICES (No tests have been applied to any of the services)

This figure is an opinion of an appropriate sum for which the property and substantial outbuildings should be insured against total destruction on a re-instatement basis assuming reconstruction of the property in its existing design and materials. Furnishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during re-construction and no allowance has been made for VAT, other than on professional fees. Further discussions with your insurers is advised.

11.0 GENERAL REMARKS

The property has been subject to alteration, sub division and extension over time to provide current layout and footprint, and it is assumed that at one point the property was one large farmhouse. The kitchen has been made into an open plan area. A rear sunroom projection has been formed, and patio doors exist. This list may not be

exhaustive.

It should be confirmed that all necessary Local Authority permissions, warrants and consents were obtained at the relevant dates.

We understand some elements of the property are both "C" listed, which will result in limitation on any future alterations that may be planned, and that the cost of maintenance and repair is likely to be at a higher level. Potential purchasers should satisfy themselves in this regard, and conduct background enquiries via Historic Scotland and the Local Authority.

We understand the access roadway is shared and it should be confirmed that appropriate rights of way exist, together with maintenance responsibilities. It was noted that a Scottish Power secondary sub station exists at the entrance driveway.

Confirm the exact extent of garden grounds, rights of way and boundaries by reference to Title Deeds.

The property is located within an area of known past coal mining activity, and therefore a mining report should be obtained as standard practice for properties in the general location.

Where items of maintenance or repair have been identified, the purchaser should satisfy themselves as to the costs and implications of these issues prior to making an offer to purchase.

12.0	VALUATION On the assumption of vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights. It is assumed that all necessary Local Authority consents, which may have been required, have been sought and obtained. No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns then they should ask for a specialist to undertake appropriate tests.

PART 3.

ENERGY REPORT

A report on the energy efficiency of the property.

energy report

energy report on:

Property address	High Peacockbank House Old Kilmarnock Road Stewarton, Kilmarnock KA3 5JG
Customer	Mrs. Claire Udal-Stewart
Customer address	High Peacockbank House Old Kilmarnock Road Stewarton, Kilmarnock KA3 5JG
Prepared by	Nick Davis, MSc MRICS Kilmarnock - Allied Surveyors Scotland Ltd

Energy Performance Certificate (EPC)

Dwellings

Scotland

High Peacockbank House, Old Kilmarnock Road, Stewarton, KA3 5JG

Dwelling type: Semi-detached house
Date of assessment: 20 November 2025
Date of certificate: 20 November 2025

Total floor area: 177 m²

Primary Energy Indicator: 225 kWh/m²/year

Reference number: 0215-9329-5539-2730-0226
Type of assessment: RdSAP, existing dwelling

Approved Organisation: Elmhurst

Main heating and fuel: Boiler and radiators, mains

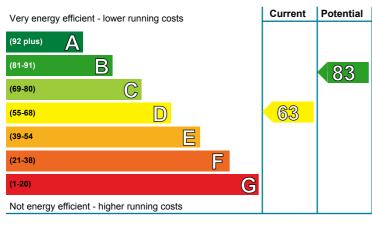

gas

You can use this document to:

- . Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£8,196	See your recommendations
Over 3 years you could save*	£1,866	report for more information

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

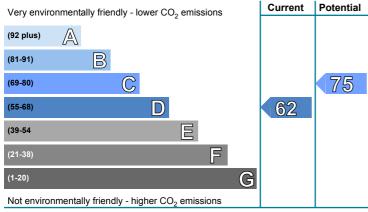

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (63)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is band D (62)

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Internal wall insulation	£7,500 - £11,000	£1425.00
2 Floor insulation (suspended floor)	£5,000 - £10,000	£441.00
3 Solar photovoltaic (PV) panels	£8,000 - £10,000	£753.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone, as built, no insulation (assumed) Solid brick, as built, no insulation (assumed)	****** ***	***** ***
Roof	Pitched, insulated (assumed) Flat, no insulation	*** ***	**** ****
Floor	Suspended, no insulation (assumed) Solid, no insulation (assumed)	_ _	_ _
Windows	Fully double glazed	***	***
Main heating	Boiler and radiators, mains gas	****	★★★ ☆
Main heating controls	Programmer, room thermostat and TRVs	****	★★★ ☆
Secondary heating	Room heaters, dual fuel (mineral and wood)	_	_
Hot water	From main system	****	★★★ ☆
Lighting	Below average lighting efficiency	***	***

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 38 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 6.8 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 2.3 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£6,963 over 3 years	£5,097 over 3 years	
Hot water	£915 over 3 years	£915 over 3 years	You could
Lighting	£318 over 3 years	£318 over 3 years	save £1,866
Total	s £8,196	£6,330	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indiantive cost	Typical saving	Rating after improvement		
		Indicative cost	per year	Energy	Environment	
1	Internal wall insulation	£7,500 - £11,000	£475	C 70	C 70	
2	Floor insulation (suspended floor)	£5,000 - £10,000	£147	C 71	C 72	
3	Solar photovoltaic panels, 2.5 kWp	£8,000 - £10,000	£251	C 75	C 73	
4	Wind turbine	£5,000 - £20,000	£712	B 83	C 75	

Choosing the right improvement package

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Internal wall insulation

Internal wall insulation involves adding a layer of insulation to the inside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk).

2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

3 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

4 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	27,405.67	N/A	N/A	N/A
Water heating (kWh per year)	2,195.92			·

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mr. Nicholas Davis
Assessor membership number: EES/022444

Company name/trading name: Allied Surveyors Scotland Ltd

Address: 91 John Finnie Street

Kilmarnock KA1 1BG

Phone number: 01563 572341

Email address: kilmarnock@alliedsurveyorsscotland.com

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

PROPERTY QUESTIONNAIRE

The owner of the property is required to complete this document which asks for information on the property such as 'Which council tax band?' etc.

Property Address	High Peacockbank House
	Stewarton, Kilmarnock
	KA3 5JG
Seller(s)	lan Stewart Claire Udal-Stewart
Completion date of property questionnaire	27/11/2025

Note for sellers

1.	Length of ownership		
	How long have you owned the property?		
	8 years		
2.	Council tax		
	Which Council Tax band is your property	in? (Please circle)	
	[]A []B []C []D [x]E []F []G []H		
3.	Parking		
	What are the arrangements for parking a	your property?	
	(Please tick all that apply)		
	Garage	[]	
	Allocated parking space	[]	
	Driveway	[x]	
	Shared parking	[]	
	On street	[]	
	Resident permit	[]	
	Metered parking	[]	
	Other (please specify):		

4.	Conservation area	
	Is your property in a designated Conservation Area (that is an area of	[]YES [x]NO
	special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	[]Don't know
5.	Listed buildings	
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	[x]YES []NO
6.	Alterations/additions/extensions	
а	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	[x]YES []NO
	If you have answered yes, please describe below the changes which you have made:	
	Wall removed between kitchen and living room and an RSJ installed	
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	[x]YES []NO
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.	
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	
b	Have you had replacement windows, doors, patio doors or double glazing installed in your property	[x]YES []NO
	If you have answered yes, please answer the three questions below:	
	(i) Were the replacements the same shape and type as the ones you replaced?	[x]YES []NO
	(ii) Did this work involve any changes to the window or door openings?	[]YES [x]NO
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):	
	Please give any guarantees which you received for this work to your solicitor or estate agent.	
7.	Central heating	
а	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of	[x]YES []NO
	the property - the main living room, the bedroom(s), the hall and the bathroom).	[]Partial

	If you have answered yes or partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).	
	gas fired	
	If you have answered yes, please answer the three questions below:	
	(i) When was your central heating system or partial central heating system installed?	
	20th August 2015	
	(ii) Do you have a maintenance contract for the central heating system?	[x]YES []NO
	If you have answered yes, please give details of the company with which you have a maintenance contract	
	A 10 year warranty with manufacturer, ideal, due to expire August 2026.	
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).	
	Don't know	
8.	Don't know Energy Performance Certificate	
8.		[x]YES []NO

Issues that may have affected your property Has there been any storm, flood, fire or other structural damage to your property while you have owned it? If you have answered yes, is the damage the subject of any outstanding insurance claim?	[]YES [x]NO []YES []NO []YES [x]NO
9 .	Energy Performance Certificate Does your property have an Energy Performance Certificate which is less than 10 years old? Issues that may have affected your property Has there been any storm, flood, fire or other structural damage to your property while you have owned it? If you have answered yes, is the damage the subject of any outstanding insurance claim? Are you aware of the existence of asbestos in your property?	[]YES [x]NO []YES []NO []YES [x]NO

а	Please tick which services are connected to your property and give details of the supplier:			
	Services	Connected	Supplier	
	Gas or liquid petroleum gas	Υ	Scottish Po	ower
	Water mains or private water supply	Υ	Scottish W	ater
	Electricity	Υ	Scottish Po	ower
	Mains drainage	Υ	Scottish W	ater
	Telephone	Υ	ВТ	
	Cable TV or satellite	Υ	Sky	
	Broadband	Υ	BT- high sp	peed full fibre
b	Is there a septic tank system at your property	?		[x]YES []NO
	If you have answered yes, please answer the	two questions	below:	
	(i) Do you have appropriate consents for the	discharge from	your septic	[x]YES []NO
	tank?			[]Don't know
	(ii) Do you have a maintenance contract for y	our septic tank?	?	[x]YES []NO
	If you have answered yes, please give details of the company with which you have a maintenance contract:			
	Scottish Water			
11.	Responsibilities for shared or common are	eas		
а	Are you aware of any responsibility to contribused jointly, such as the repair of a shared dr boundary, or garden area?			
	If you have answered yes, please give details	ş.·		[x]YES []NO
			vo i o fill	[]Don't know
	Neighbours' agreement to contribute to cost of in potholes- work completed by neighbour an			
b	Is there a responsibility to contribute to repair and maintenance of the roof, common stairwell or other common areas?		nce of the	[]YES[]NO
	If you have answered yes, please give details:			[x]N/A
С	Has there been any major repair or replacement of any part of the roof during the time you have owned the property?		[x]YES []NO	
d	Do you have the right to walk over any of your neighbours' property- for example to put out your rubbish bin or to maintain your boundaries?		[]YES [x]NO	
	If you have answered yes, please give details:			

е	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?	[]YES [x]NO	
	If you have answered yes, please give details:		
f	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privatelyowned.)	[]YES [x]NO	
	If you have answered yes, please give details:		
12.	Charges associated with your property		
а	Is there a factor or property manager for your property? If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	[]YES [x]NO	
b		[]YES [x]NO	
	Is there a common buildings insurance policy?	[]Don't know	
	If you have answered yes, is the cost of the insurance included in your monthly/annual factors charges?		
С	Please give details of any other charges you have to pay on a regular basis for the upkeep of common areas or repair works, for example to a residents' association, or maintenance or stair fund.		
	none		
13.	Specialist works		
а	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	[x]YES []NO	
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.		
	woodworm, rotting wood fungus and rising damp work completed in March 2018 by us		
b	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	[x]YES []NO	
	If you have answered yes, please give details:		
	Preventative measures for the reoccurrence of the above, including		
	damp proof course and treatments against reinfestation.		

If you have answered yes, these guarantees will be needed by the purchaser and should be given to your solicitor as soon as possible for checking. If you do not have them yourself please write below who has these documents and your solicitor or estate agent will arrange for them to be obtained. You will also need to provide a description of the work carried out. This may be shown in the original estimate. Guarantees are held by:

14.	Guarantees		
а	Are there any guarantees or warranties for any of the following:		
(i)	Electrical work	[]NO [x]YES []Don't know []With title deeds []Lost	
(ii)	Roofing	[]NO [x]YES []Don't know []With title deeds []Lost	
(iii)	Central heating	[]NO [x]YES []Don't know []With title deeds []Lost	
(iv)	National House Building Council(NHBC)	[]NO []YES [x]Don't know []With title deeds []Lost	
(v)	Damp course	[]NO [x]YES []Don't know []With title deeds []Lost	
(vi)	Any other work or installations? (for example, cavity wall insulation, underpinning, indemnity policy)	[x]NO []YES []Don't know []With title deeds []Lost	
р	If you have answered 'yes' or 'with title deeds', please give details of the work or installations to which the guarantee(s) relate(s): Some rewiring, instillation of new distribution board, sockets and switches, light fittings, smoke detectors x2 and 1 heat detector Timbers and slates replaced on front elevation of roof, chimneys stabilised and repointed, box guttering renewed with Lead (code 5) Gas boiler has a 10 year warranty due to expire in August 2026 Damp proof course completed		
С	Are there any outstanding claims under any of the guarantees listed above?	[]YES [x]NO	
	If you have answered yes, please give details:		

15.	Boundaries		
So far as you are aware, has any bour moved in the last 10 years?	So far as you are aware, has any boundary of your property been	[]YES [x]NO	
	moved in the last 10 years?	[]Don't know	
	If you have answered yes, please give details:		
16.	Notices that affect your property		
In the past three years have you ever received a notice:			
а	advising that the owner of a neighbouring property has made a planning application?	[]YES [x]NO	
b	that affects your property in some other way?	[]YES [x]NO	
С	that requires you to do any maintenance, repairs or improvements to your property?	[]YES [x]NO	
	If you have answered yes to any of a-c above, please give the notices to your solicitor or estate agent, including any notices which arrive at any time before the date of entry of the purchaser of your property.		

Declaration by the seller(s)/or other authorised body or person(s) I/We confirm that the information in this form is true and correct to the best of my/our knowledge and belief.
